

FIAT DOBLÒ COMBI SLIDING BULKHEAD

FIAT DOBLÒ COMBI

Snoeks Automotive B.V., the crew van specialist for Europe has developed a sliding bulkhead especially for the Fiat Doblò Combi.

By adding a mesh grill sliding bulkhead to the foldable second seat row, it is possible to adjust your Doblò Combi into a panel van in a safe manner at all times. The perfect solution for the combined transport of people and material. Safe, comfortable and efficient.

Obviously the bulkhead mesh grill applies to the highest European safety standards. The construction is designed to meet the ISO/BS 27956 standard for load shifting protection and is tested and approved in both positions.

Design also plays an important role when Snoeks develops a conversion. Materials and shapes as close to OE-design as possible. The fine designed partition wall separates load and passenger compartment.

The conversion comes with:

- Mesh grill sliding bulkhead
- Durable, high quality sliding system including safety locks in both positions

Optional equipment:

- High quality ply finishing
- ABS Wheel arch covers
