

VOLKSWAGEN T5 KOMBI BULKHEAD

Snoeks Automotive B.V., the leading LCV-conversion specialist for Europe, has developed a C-pillar bulkhead especially for the Volkswagen Transporter Kombi. The perfect solution for the combined transport of people and material. Safe, comfortable and efficient.

An excellent standard of quality is guaranteed due to the fact that the entire process, including design and production of the parts, is in Snoeks own hands. Snoeks has been the trendsetter in van-solutions for many years.

Safe

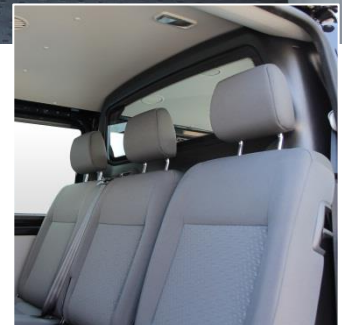

Obviously this rigid partition offers maximum protection against shifting cargo and applies to the highest European safety standards. When correct fitted the separation wall is designed and tested to meet the ISO 27956/DIN 75410-3 standard for load shifting protection.

Comfort

Next to safety the Snoeks bulkhead offers reduction of noise and dust to your rear passengers. The integrated fine-designed partition wall is made of high-strength ABS-plastic finished with a glued safety window. It separates load and passenger compartment completely. Materials and shapes are as close to OE-design as possible.

Ordering

Snoeks offers their product range through their certified fitting partners throughout the UK. Please contact our sales team for details.
